This is in response to the letter dated September 13, 2012 regarding the substantial increase and decrease in certain categories of receipts and disbursements on the April 2011 through April 2012 quarterly reports. Prior to January 2012 all reports were prepared by a volunteer with no previous experience or knowledge of FEC regulations. As of January 2012 we engaged a professional CPA firm to handle all accounting and reporting functions of the Campaign to the FEC. After reconciling the bank accounts for these periods, they determined that previously filed reports inadvertently omitted the necessary details required by the FEC. At that point amended reports were prepared and filed disclosing the correct information and reported all receipts and disbursements to agree with the exact amounts which were processed through the bank. The Campaign has established procedures to ensure internal controls are followed and the bank accounts are reconciled monthly. This will safeguard against future discrepancies.
